SNAP

Problem Solving Model

It can be helpful to have a step-by-step way to solve problems.

① **State the problem**
Choose a problem and clearly state it in one sentence.

② **Name the goal**
Say exactly what behavior you want to see.

③ **All possible solutions**
Make a list of all the things you could do.

④ **Pick the best option and try it out**
Try out the option you picked. If it doesn't work, then you can pick a different option from your list.
